Markdown Reference Guide

1. Headings
Use # to create headings. The more #, the smaller the heading.

before your text creates a **big title**.
before your text creates a **medium title**.
before your text creates a **small title**.

Example 1: # Heading1

Result 1: Heading 1

Example 2: ### Heading 3

Result 2: *Heading 3*

2. Italicized Text
To make text *italic*, put it between asterisks *.

Example: *Italicized text*

Result: *Italicized text*

3. Bold Text
To make text **bold**, use two asterisks **.

Example: **Bold text**

Result: **Bold text**

4. Bold and Italicized Text
To make text ***italicized and bold***, use three asterisks ***.

Example: ***Italicized and bold text***

Result: ***Italicized and bold text***

5. Underlined Text
Markdown does not have a built-in way to underline, but you can use the HTML tags <u></u>.

Example: <u>Underlined text</u>

Result: Underlined text

6. Monospace Text

To create monospace (code) text, enclose your text within backticks `.

Example: `Monospace text`

Result: `Monospace text`

For blocks of code or multi-line code, use triple backticks

7. Paragraphs
To create paragraphs, just leave a blank line between blocks of text.

Example:

This is the first paragraph.

This is the second paragraph.

Result:

This is the first paragraph.

This is the second paragraph.

8. Nested Lists

a. Bulleted Lists
To create a bulleted list, use -, +, or *. For nested bullet points, indent with two spaces.

Example:

- Item 1
  - Subitem 1.1
  - Subitem 1.2
- Item 2

Result:

- Item 1
    - Subitem 1.1
    - Subitem 1.2
- Item 2

b. Bulleted Lists Within Numbered Lists
For numbered lists, use numbers followed by a period (1., 2., etc.). To create bulleted sub-lists, use -, +, or * and indent with two spaces.

Example:

1. First item
  - Subitem a
  - Subitem b
2. Second item

Result:

1. First item
   a. Subitem a
   b. Subitem b
2. Second item

9. External Links

To add an external link, use the format [Link Text](URL)

Example:

[Rumble Museum](https://www.cheneyschool.org/181/rumble-museum)

Result:

Rumble Museum

The result is a link embedded in the text 'Rumble Museum'
